

New Features and Enhancements for 2005-06

- **Enhanced Ticket Allocation Module** - Permits more flexible ticket allocation. Support creating up to 99 groups of student-athletes, coaching staff and others, each with its own set of rules, to support your institution's complete complimentary ticketing and pass list needs.
- **Family Roster Freeze** - Family rosters may be "frozen" at any time for individual student-athletes. Frozen rosters will still accept friends and college students, as well as address changes for family members.
- **Import Family Rosters** - When importing returning players from previous year rosters, importing family addresses is now optional. Family rosters may be frozen for all returning players.
- **No Incoming Transfer Option** - Allows incoming ticket transfers to be disabled for individuals.
- **Required Information** - Addresses may be required for all player guest invitees.
- **Visit Manager** - Major new module to:
 - Schedule and monitor official and unofficial visits.
 - Build pass lists for prospective student-athletes and their family and friends in support of compliance with NCAA By-laws 13.6 and 13.7 for on-campus visits.
 - Provide a secure interface for on-the-road access for busy coaches and coordinators to schedule visits and review the visit history of prospective student-athletes.
 - Assign student host(s) to a prospective student-athlete on campus a visit.
 - Generate on-demand gate-list with up-to-the minute tracking of the number of seats requested.
 - Track academic requirements and status to determine eligibility for official visits.
 - Create a written record of paid visits in support of compliance with NCAA By-law 13.6.2.6.4.
 - Provide assignable functions and auditing to foster compliance and control.
- **Additional Tickets** - The optional list for VIP Guest Tickets has been increased to 9,999 entries per game.
- **Control Panel Options** - New functions will permit greater flexibility in access management and compliance monitoring as well as routine maintenance tasks.
- **Improved Navigation** - New web links allow shortcut access to pertinent information.
- **System Performance and Reliability** - Numerous performance improvements for greater system security and stability.
