

## New Features and Enhancements for 2007-08

- **DATA\_CHK Module** - Data integrity has been enhanced with an active data management system which flags questionable data on the team member's guest list and family roster. This fully integrated module allows improved compliance in identifying guests and improving diligence. Persistent status flags allow compliance staff to see at a glance any identified data integrity problems. Questionable data may be flagged for later review.
- **USER Administration** - The Admin function has been redesigned to provide faster access and setup. Only pertinent options are displayed, allowing quick setup and maintenance.
- **Ticket Request Summary** - New Gate List interface gives instant snapshot of game information. Shows number of active requests for each team member as well as the total number of requests. Incorporates list of players who have no request currently entered and allows sending a quick email reminder to those have yet to make a request.
- **Mail Center** - New layout allows copying staff on emails sent to team members or family captains. Data Flag button permits easily sending an email to all team member and/or captains with identified data problems.
- **Record Archive** - Log files are automatically archived and preserved.
- **Enhanced Reporting** - New Exception Report scans all family and guest rosters to identify all potential problems with non-compliant data.
- **Improved Navigation** - New web links allow shortcut access to pertinent information. Every name in every list is now linked to the associated team member page.
- **System Performance and Reliability** - Numerous performance improvements for greater system security and stability.
